Additional Information

If testing for a disease or a disorder was performed and results indicate the animal is affected or at risk, we recommend contacting your veterinarian for further clinical evaluation and for additional information on disease and management.

For more detailed information on PRA test results, please visit our website at:
www.vgl.ucdavis.edu/services/dog/Sloughi.php

This test is specific for the 8 base insertion in the PDE6B gene associated with PRA in the Sloughi breed.

For terms and conditions of testing, please see www.vgl.ucdavis.edu/about/terms-and-conditions

Results are determined using PCR-based methods. The results relate only to the sample tested as identified by the submitter (for example, identity and/or breed).
